

Raj Reddy Center for Technology and Society (RCTS)

Research and Technology for Social Impact and Sustainable Solutions

Jan - Jun 2026 Report

RAJ REDDY *center for*
TECHNOLOGY
& SOCIETY

INTERNATIONAL INSTITUTE OF
INFORMATION TECHNOLOGY
HYDERABAD

RAJ REDDY *center for* TECHNOLOGY & SOCIETY

Driving research and technology towards sustainable and scalable solutions that generate measurable social impact and global advancement.

Dr. Raj Reddy

Moza Bint Nasser University
Professor, Carnegie Mellon
University

Founding Chairman,
International Institute of Information
Technology, Hyderabad

One of the seminal leaders in defining the field of applied artificial intelligence and demonstrating its technological significance, he is the only Indian to win the prestigious Turing Award in 1994 for his pioneering work in artificial intelligence.

Raj Reddy is renowned for his work in computer speech recognition, robotics, human-computer interaction, innovations in higher education, and efforts to bring digital technology to people on the other side of the “digital divide”.

Established in 2021 by IIIT Hyderabad as part of its comprehensive ecosystem for translation research, the center anchors the institute's efforts to create social impact through technology-driven solutions. RCTS celebrates and aims to amplify the passion of Dr. Raj Reddy, the founding chairman of the institute in education and research for the bottom of the pyramid.

The Center has taken a problem centered approach to leveraging research & technologies in solving societal problems. It will focus on identifying social challenges as themes in specific domains and take up projects in them with NGOs to create public scale solution with a sequentially linked amplification of impact.

Impact Summary: activities of RCTS from Jan-Jun 2026

Broad Projects Areas

EDUCATION

The Storyweaver platform of Pratham books has been enabled with content discovery to a broader & diverse audience of about **~50,000 reader community** approx. with the in-context translation in multiple indian language

HEALTHCARE

In AIG, **~2,100 subjects (~11,000 images)** and in Choice Foundation, **~1,700 subjects (~8000 images)** were collected to further model train the algorithm.

MENTAL HEALTH

First field screening effort completed, **~45,000 children screened in schools** across Rangareddy and East Godavari District Govt. Schools. (Dec 25 - Mar 26)

Community Sourced Volunteer Programs

C4GT DMP program

DMP 2026: **40 projects** with **14 organizations** in the areas of Edtech, Healthtech, Fintech, & others

C4GT Hubs

81 enrolled, 25 selected for **Capstone internship** with **30k stipend**, and 9 leaders for the next batch

Corporate Engagement

2 projects developed through corporate engagement: with **24 volunteers** of **Infosys** and **2 mentors**

Impact Fellowships

- Final-year Internship: **50 interns, 42 successfully completed** for 3 months of time period
- **11 organizations** were part of this program (NGOs + academic institutions)
- 2 SheCodes Workshops: **500 registered, 240 selected, 55 worked** on real project issues

Projects in Education - 4 underway

3 under field-adoption and 1 under development

Site Localization Tool Integration:

Developing To integrate Tolgee with the StoryWeaver platform for in-context translation in multiple languages

PRATHAM BOOKS

A Book in Every Child's Hand

Integrate the translator tool on the storyweaver platform for 50k+ reader community

English Speech Assessment:

Developing an ML-powered application to assess quality of student speech and help them improve by providing a detailed word level feedback.

Plan to have this go-live with Nirmaan org in 10-20 of their partner govt schools

Digital Library Wall:

Developing a digital library application to bring curated books to rural students and promote & support reading and communal learning.

Plan to have this go-live with Nirmaan org in 15+ govt schools with over 2000 students

ನಮಸ್ಕಾರ
ವಣಕ್ಕು
ಹಾಲೋ

Technologies for Inclusive Communication:

like Sign Language tools
Developing an ML-powered solution to auto generate embedded Indian sign language and translations into Indian oral languages for scaling content generation for a diverse & inclusive audience.

Collect sample videos of ISL instructors with vocabulary glossary

Projects in Healthcare - mother and child focused

3 projects active 1 completed

Focus Areas

Mother and Child Well-being

Upscaling operations

Developing public scale solutions

GRACE
CANCER FOUNDATION
helping, hoping, healing

Choice Foundation
...every life counts

Projects almost ready for deployment:

Non-invasive Anemia Screening

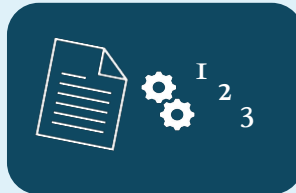

Developing an ML-powered public scale solution to screen for anemia non-invasively by detecting pallor changes in skin using smartphone images.

In AIG, ~2,100 subjects (~11,000 images) and in Choice Foundation, ~1,700 subjects (~8000 images) were collected to further model train the algorithm. More collection ahead.

Growth Tracking:

Developing an ML-powered anthropometric measurement solutions to enable measurement and tracking of child growth and assessment of malnutrition state, without the need for custom hardware.

Cancer Risk Stratification:

Developing an ML-powered process to generate cancer risk scores based on radiology reports of x-rays, mammograms, and pap smears.

Primary Health Care Platform:

Developing an easy to customize form builder and platform for medical screening and data collection.

Application revamped based on previous data collection drive and pilot learnings

Mental Health Projects under development - with Data Collection efforts

Focus Areas

Children Mental Well-being

Assisting teachers & psychologists

Partners

Choice Foundation
...every life counts

Projective Psychological Assessment:

Developing an AI powered application to automatically assess projective psychological test like the House-Tree-Person test, to generate a qualitative report of the child psychological state.

First field screening effort completed, ~45,000 children screened in schools across Rangareddy and East Godavari District Govt. Schools. (Dec 25 - Mar 26)

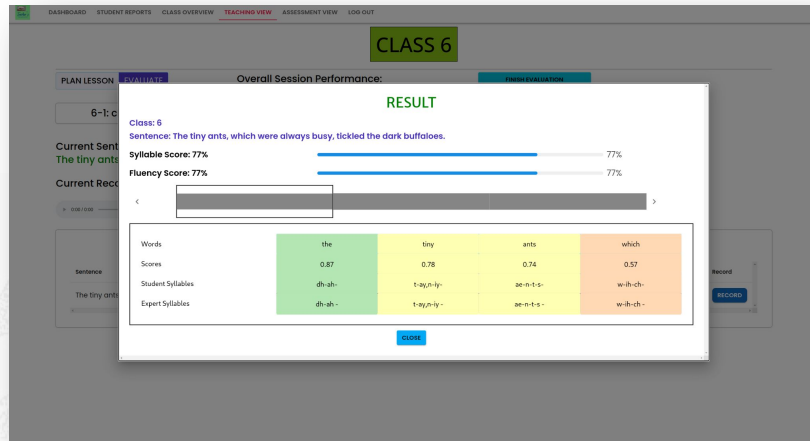

Handwriting Analysis for identifying early neurodevelopmental conditions:

This project is in collaboration with Dr. Govindaraju's, from research on handwriting analysis for identifying early neurodevelopmental indicators of dyslexia, dysgraphia, or coordination disorders. Digitized writing samples can assist educators, clinicians, in timely and early intervention and support.

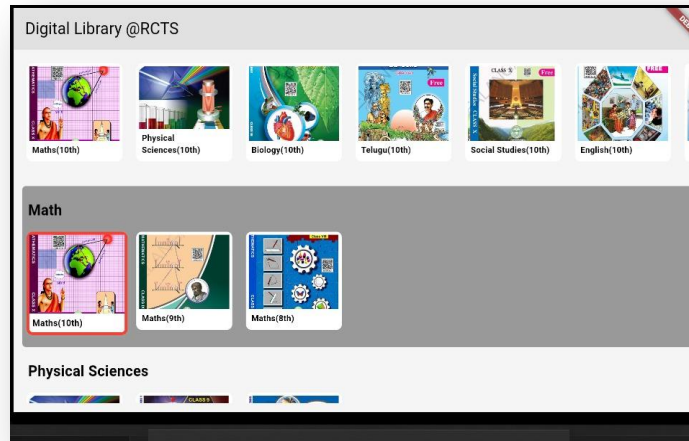

Data Collection of ~30,000 children sample handwritings underway with schools from different regions of AP and Telangana

Projects COMPLETED in the past year

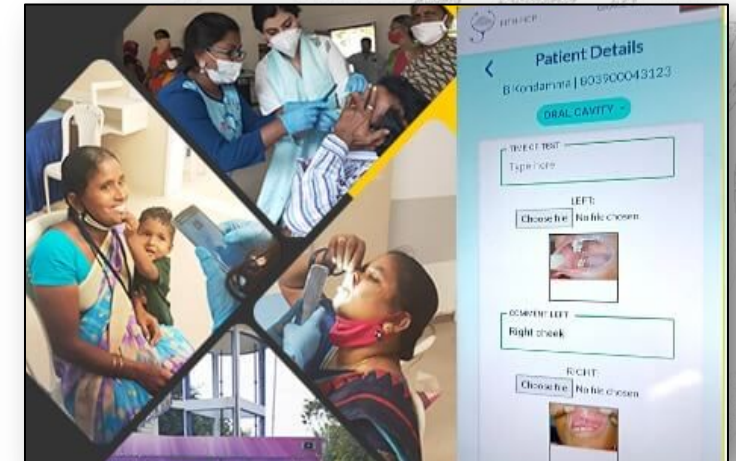

Tool for English language learning

This project is developing a teaching assistance tool for the teachers to teach English language with pre-existing language learning module that grades English speaking proficiency.

The Library Wall project

The Library wall project is to bring digital libraries, with a curated set of books as per the interest of the students, for the rural government schools for offline use.

Algorithm for Oral Cancer Screening

This algorithm is being built for early screening of oral cancer through some mobile clicked images for prevention and detection, diagnosis and treatment of patients with oral cancer.

Numbers from The Community Sourced Volunteer Model of RCTS

12 in the Core team and 100+ Volunteers through C4GT initiatives

Funding - 70 Lacs funds received in the past 6 months

Received Funds from —

- 10 Lakhs from KIET

- 29 Lakhs from Qualcomm CSR

- 20 Lakhs from Samagra for DMP 2026

- 1 lakh from Pratham Books

Funds confirmed but yet to receive —

- 52 Lakhs from KIET

Proposals Underway —

- 80 Lakhs with Qualcomm

- 6 Lakhs with PlanetRead

Impact tracking: view of Active projects

Name	Description	NGO & Field	Start Date	Current Status	Impact Short term - Pilot	Year 1 Proj Impact (planned)	Due Date
ACTIVE PROJECTS (from 2025 onwards)							
HEALTHCARE DOMAIN							
Maternal and Child Health							
Projective Mental Health Screening through HTP tests	Developing automated analysis tools for the House-Tree-Person Tests for evaluating developmental mental health conditions	Choice Foundation	Dec 2025	UNDER DEVELOPMENT	Automated mental health assessment of ~5000+ primary school children [Apr 26]	Approx ~60,000 children primary mental health screenings ~100 frontline workers trained to use the solution	Dec 2027
Algorithm for Anemia Screening	Algorithm to detect anaemia in mothers & children through image capturing with 90% accuracy	Choice Foundation	Dec 2025	UNDER FIELD TESTING	To be able to screen ~3000 children with 85% accuracy [Dec 26]	To be able to screen for anemia in approx ~50,000 school children with 90% accuracy	Apr 2027
Growth & Nutrition Tracking	Auto detect any malnourished conditions in anaganwadi children through height & weight capturing	Choice Foundation	Sep 2025	UNDER DEVELOPMENT	~2,000 school kids screened for malnutrition [Nov 2026]	~20,000 school kids screened to auto detect malnourishment	Aug 2027
Cancer Risk Prediction & Screening							
Cancer Risk Stratification (RCTS & CDiTH in collab)	Cancer Risk stratification of patients based upon radiological & cytology reports	Grace Cancer Foundation	March 2025	UNDER DEVELOPMENT	~500+ patients screened with 80% accuracy [Sep 2026]	~2000+ patients impacted screened for cancer risk with above 90% accuracy	Sept 2026
EDUCATION DOMAIN							
Language & Assessment Inclusive Education Tools							
English Speech Assessment Tool (GONDI)	A teaching assistance tool to teach English to students in a classroom environment	Uthnoor, TG	Sep 2026	UNDER DEVELOPMENT	Help approx ~10 teachers and ~100 students interact in gondi-hindi-english languages	impact approx ~3000 school students to help speaking in hindi-gondi language impact ~100+ teachers with gondi language	Dec 2027
Site Localization Tooling Integration	To integrate Tolgee with the StoryWeaver platform for in-context translation in multiple languages	Pratham Books	May 2026	UNDER DEVELOPMENT	Gujrathi language facilitation to help ~1000+ volunteers from the community [Jun 26]	To impact ~1 million readers from story weaver platform associated with Pratham books	July 2026
AI-Enabled Multimodal Accessibility for Sign and Indic Languages	Generation of ISL gloss-to-video dictionaries to develop a platform for creating accessible content at scale	Ashray Akriti	June 2026	UNDER DEVELOPMENT	Generating ~50 ISL videos to be used widely by differently abled learners [Dec 26]	Impacting ~650+ differently abled learners with ~200+ ISL videos ~100+ ISL interpreters	April 2027
Same Language Subtitle Quality Checker	Developing an audio transcription engine development for Hindi language and then extension to other 4 Indian languages	Planet Read	August 2026	SCOPED - YET TO START	Benefit ~500+ readers with the transcribed language [Feb 26]	Impact ~10 million readers with transcribed lang	December 2027
Roman to Indic Script Generator	Development for single language (Hindi) for Roman to Indic and Indic to Roman generator tool	Planet Read	August 2026	SCOPED - YET TO START	Benefit ~500+ readers with the roman to indic tool [Feb 26]	Help impact ~1 million readers to read from roman to indic languages	August 2027

Plans for the next 6 months —

Broad Projects Areas

Education

- Language Accessibility Project with Ashray Akruthi, complete initial milestones as well as initial pilot production of **25 ISL videos** [Nov 26]
- Successfully integrate the translating tool with Storyweaver platform of Pratham Books for their **~50,000 reader community** [Aug 26]
- Develop Speech assessment tool in Gondi Language [Dec 26]

Healthcare

- Collect **~3000 children data** for anemia screening application, through Swecha and ~10000 children in Mahbubnagar with Choice Found [Oct 26]
- Find one field partner for the growth tracking project for malnutrition detection [Aug 26]
- Complete PHCP refinement and pilot in field for usability testing [Sep 26]

Mental Health

- Complete Feasibility Study for Digital Mental Health [Nov 26]
- Screen **~30,000 students** with Choice Foundation on the field [Feb 26]
- Collect handwriting samples of **~30,000** for identifying neurodevelopmental conditions in children [Dec 26]

Community Sourced Volunteer Programs

C4GT DMP program

Close 40 DMP 2026 projects capture their impact and **launch** the DPG State of Community **Report 2026**

C4GT Hubs

Launch cohort 4 with 81 enrolled and completion project rate of **90%** targeted. Expand to **onboard a new college** to host the hub program.

Corporate Engagement

Expand to get volunteers from **3 more corporates with 2 more projects** to directly amplify the work of 2 social orgs.

Impact Fellowships

- Explore a long-term **collaboration with Qualcomm** by building on the successful **Impact Fellowship Program pilot**.
- Conduct **2 SheCodes workshops** to introduce more women to the Tech for Good ecosystem, including designing Qualcomm-exclusive workshops tailored for Qualcomm Scholarship students.

Thank you

About - C4GT IMPACT Fellowship/ Final-year Internships

About the Project:

Project Summary

The Impact Fellowship Program (IFP) 2026 is an initiative of the Raj Reddy Centre for Technology & Society (RCTS), IIIT Hyderabad, supported by Qualcomm through its Corporate Social Responsibility (CSR) mandate. Running from January to March 2026, the program aims to bridge the gap between academic learning and real-world technology impact empowering students to contribute meaningfully to NGOs, Non-Profits, Digital Public Goods and Tech-for-Good builder organisations.

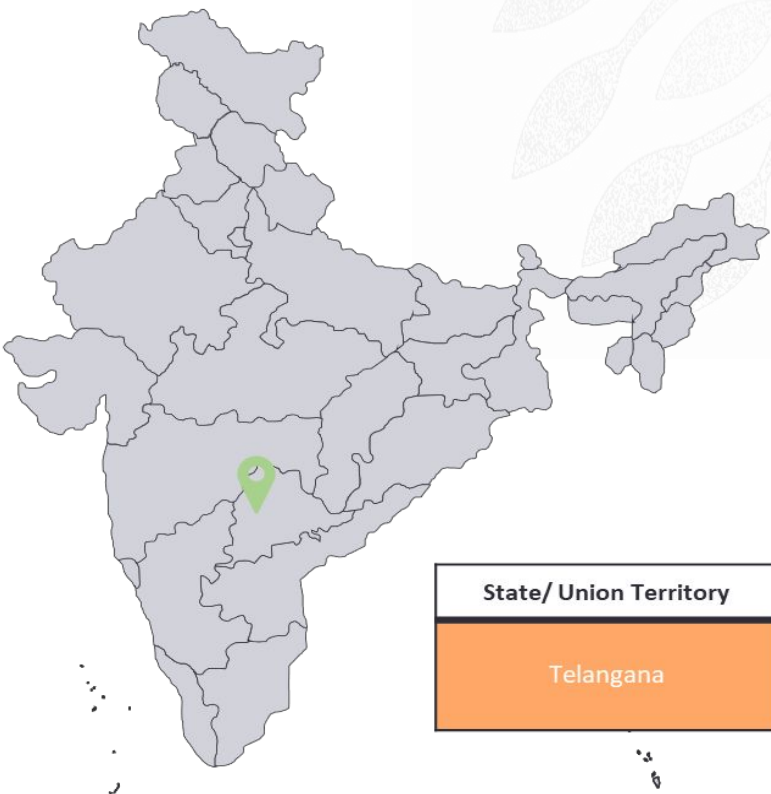

The program comprises three sub-initiatives, each targeting a distinct stage of student engagement:

- Final Year Internships
- SheCodes Workshops
- Qualcomm Workshops

Key Goals

Goal 1: Create pathways for students from Tier 2 and Tier 3 colleges, especially women, in the Digital Public Goods (DPG), and Tech-for-Good ecosystem through workshops, mentorship, and real-world social impact internship opportunities.

Goal 2: Enable NGOs, Non-Profits, Digital Public Goods (DPG), and Tech-for-Good builder organizations to leverage skilled student contributors for solving real-world challenges.
